

Proposition de conception de votre Jardin

PLAN MASSE

Bosquet d'arbres à petites végétation et arbustif haut, brisant les angles et offrant une scène de zone boisée en face de la suite parentale

Espace piscine aux abords sobre, sans végétation à proximité immédiate de la zone de baignade, limitant ainsi les risques d'obstruction des systèmes de filtration

Murs mitoyen habillé de végétation grimpante, type jasmin, fixée sur câbles inox – Espace pelouse sous le rolling-deck de la piscine en gazon synthétique

Création d'une véritable zone boisée – mêlant arbres à grande végétation caducs et persistants, strates arbustive et vivaces – créant un nouveau fond de tableau au jardin depuis la maison, occultant les vis-à-vis des habitations avoisinantes

Proposition d'une circulation douce au travers de la végétation, accessible depuis le portillon d'accès piéton, faisant entrer en douceur le visiteur au sein du jardin, procurant ainsi un effet de surprise à la découverte de l'ensemble

Fond de jardin boisé conservant le figuier et le laurier existant, en y associant une strate arbustive et vivace

Habillage des blocs de pompes à chaleur, à l'aide de panneaux de bois ajurés, et végétalisation des abords, créant ainsi un espace de circulation inclut au jardin
Travail de la végétation en jardin d'ombre / Ambiance de sous bois

Grande haie de bambous hauts créant un fond de tableau végétalisé occultant les vis-à-vis des habitations avoisinantes

Bosquet de végétations en différentes strates, occultant les habitations avoisinantes depuis la vue de la piscine, limitant la vue de l'allée d'accès véhicule, et créant un espace intimiste pour la salle à manger d'extérieur

Zone engazonnée aux formes courbes, inspirées des grands espaces naturels, proposant des zones cachées invitant à la découverte et à la promenade

Allée d'accès véhicule pavée, aux abords végétalisés, atténuant ainsi la régularité et la linéarité du passage
